

Ilia Mashkov

Frontend Developer

iliamashkov@proton.me • [LinkedIn](#) • Serbia

Frontend Developer with 4+ years of experience across web and mobile, working with a broad stack — from React-based solutions to Svelte and Astro — across real-time dashboards, performance-critical interfaces, and data-driven tables. Driven by love of craft and attention to detail, I consistently push products beyond baseline expectations — threefold TTI improvement and a doubled conversion rate among the highlights. Empowering my workflow with a fine-tuned arsenal of AI tools, MCPs, custom agents, and skills, I accelerate development while enforcing strict architectural standards. Open to new challenges and ready to contribute from day one.

Experience

Jetlend, Fintech: crowdlending market leader in Russia

Moscow, Russia

Frontend Developer (Middle)

January 2024 – May 2026

Delivered frontend across multiple products — web and mobile client applications, internal dashboards, and a company landing page — serving 30,000+ daily users.

- Cut TTI for the internal dashboard threefold — from 10 to 3 seconds — by re-architecting the API and refactoring the frontend. Achieved this by introducing virtualized lists, lazy loading, and request deduplication, while collaborating with backend to optimize the data schema.
- Led the development of a redesigned registration module that doubled conversion rates against the historical average. Optimized the user path by moving secondary data collection steps from the initial sign-up flow to future in-app actions.
- Cut feedback loops by involving QA at the planning stage and aligning management requirements with existing UI library constraints — reducing communication overhead caused by false-positive QA alarms.

Leads For Finance, Fintech: lead generation for banks

Barcelona, Spain

Frontend Developer (Junior)

December 2022 – November 2023

Migrated frontend from PHP to React, delivering a production-ready lead-generation platform with a complex multi-step form at its core.

- Refactored a half-finished freelance codebase into a scalable, maintainable application. Transformed a non-maintainable 1,500+ line 'all-in-one' component into decoupled, encapsulated, and fully testable modules.
- Pitched and led the development of a new user dashboard, handling everything from initial task decomposition to release. This feature enabled users to manage and update their profile data independently, improving the overall user experience.

Skills

- Programming Languages: JavaScript, TypeScript
- Architectural Methodology: Feature-Sliced Design
- Frontend Frameworks: React, React Native, Next.js, Svelte, Astro
- State Management: Redux, Redux Toolkit, Redux Saga, Zustand, MobX

- Styling: CSS/LESS/SASS Modules, Styled Components, Tailwind
- Animation: GSAP, Framer Motion
- Data & APIs: RESTful API, WebSockets
- Testing & CI/CD: Jest, Vitest, React Testing Library, Playwright, Storybook, Loki GitHub Actions, Lefthook, Husky
- Monitoring: Sentry, Grafana
- Build & Publish: Webpack, Vite, Vercel, Expo, Docker
- AI Tools: Claude Code/Opencode with MCPs, custom agents and skills

Languages

- English: Proficient (B2)
- Polish: Intermediate (B1)
- Russian: Native/Fluent
